ABOUT US

SUPPORTING SCIENTISTS FOR THREE GENERATIONS

Gilson is a family-owned global manufacturer of sample management and purification solutions for the life sciences industry. We help researchers advance the pace of discovery by creating easy-to-use lab devices that improve reproducibility and traceability. Since 1957, we’ve been developing innovative products, such as the first continuously adjustable-volume pipette, PIPETMAN®. By partnering closely with the scientific community, we have advanced our portfolio offerings, adding automated pipetting systems and sample separation instruments, plus intuitive software management capabilities. Backed by worldwide R&D, service, and support, Gilson strives to enable verifiable science and to make lab life easier for our customers.

ENABLING VERIFIABLE SCIENCE

Today, one of the biggest challenges facing scientists centers on verifiable data. Scientists need to trust that published conclusions are accurate and will stand the test of time. Trusted sample preparation is at the core of data accuracy and reliability. That’s why we create instruments and services that help reduce errors and improve scientific results

We have been manufacturing reliable instruments for decades, like the legendary PIPETMAN®. When researchers use trusted, built-to-last tools, scientific experiments become more reproducible, the speed to discovery is faster, costs are reduced, and confidence grows.

Our Vision

Enabling verifiable science and making lab life easier for researchers.

Our Mission

To partner with the scientific community and help researchers advance the pace of discovery by creating instruments and services that improve their results.

AUTOMATION: A GRADUAL TRANSITION

Automation does not have to be a drastic change; instead, it can be a gradual transition from manual to hybrid processes, eventually leading to full automation. We can assist you in shifting your manual tasks to automated ones while guiding you through the necessary changes to enhance your lab’s productivity, traceability, and reproducibility. By following a comprehensive approach, we help labs transition to automation smoothly and efficiently, ultimately enhancing overall performance and scientific results.

CORPORATE RESPONSIBILITY

Gilson has been around for 75 years and counting, and sustainability is in our genes. Our involvement in protecting the environment extends to our financial resources, operations, employees, suppliers, customers, and the communities we live and work in daily.

From carefully designing our products to be greener, to protecting our environment through small changes in our daily work, you can be sure that sustainability is at the core of what we do. Our plastic manufacturing center has been awarded the EcoVadis Bronze Medal for Excellence in Environmental Responsibility, Social Laws, Business Ethics, and Supply Chain Management. We also maintain a number of initiatives that help us to give back to the amazing scientists in the field and support access to science for all. In addition to our initiatives at Gilson Plastics, our Gilson manual liquid handling site in Villiers-le-bel, France, received the “Committed Company” badge from EcoVadis for its sustainability practices.

EXPERTISE FOR YOUR APPLICATIONS

For decades, we've been helping researchers advance their discoveries with easy-to-use, application-based lab tools that improve reproducibility and traceability. Click below to search our diverse application library, using techniques such as liquid handling, sample extraction, and purification.

Bioassay Systems and Tools that Accelerate Discovery

High-quality bioassays start with precise and repeatable preparation. Whether you're validating an ELISA, building dose-response curves, or scaling to 384-well screens, consistent liquid handling helps you move through discovery faster and with greater confidence. Gilson's bioassay systems and tools support accurate, reproducible, and efficient assay setup so your team can generate results you trust.

LEARN MORE

Confidence You Can Quantify for Every qPCR Workflow

Successful qPCR depends on precise setup, clean workflows, and consistent reaction prep. Gilson systems both manual and automated, support these requirements with tools that help you standardize plate loading, minimize contamination risks, and maintain reproducibility, whether you're preparing a few reactions or scaling to high-throughput automation.

LEARN MORE

Where Consistent NGS Prep Begins

Reliable sequencing depends on consistent library preparation. Automated magnetic bead-based cleanup, including workflows built on AMPure® XP methods, helps ensure high-quality libraries from the start. Gilson's automated systems support these steps with trusted precision and intuitive, no-coding software, giving your NGS workflow the reproducibility it needs to scale confidently.

FEATURED APPLICATIONS CONTENT

Article

Time Savings Using PIPETMAN® M96 in an ELISA Protocol

PIPETMAN® M96 streamlines ELISA workflows by reducing pipetting time by up to 70% compared to manual multichannel pipettes. Its semi-automated design simplifies plate washing and reagent addition, improving consistency and reducing repetitive strain for technicians. With faster protocols and higher throughput, PIPETMAN M96 offers a practical alternative to full automation, delivering efficiency, accuracy, and flexibility for busy labs. Ideal for teams looking to save time, boost productivity, and maintain reliable results without investing in large automated systems.

Application Note

Automation of the Agencourt® AMPure® XP PCR Purification System on PIPETMAX® 268

The AMPure® XP workflow is automated on PIPETMAX® 268 to streamline PCR cleanup for next-generation sequencing. Using SPRI magnetic beads, the method efficiently removes contaminants while isolating DNA fragments over 100 bp. When applied to E. coli K12 gDNA libraries, the system produced clean, high-quality fragments between 700–2000 bp. Users can tailor volumes, incubation steps, and washes to accommodate a wide range of laboratory requirements.

OEM CAPABILITIES

ORIGINAL EQUIPMENT MANUFACTURER PRODUCTS

Bring your ideas to market faster and with lower development and manufacturing costs by becoming an Original Equipment Manufacturer (OEM) partner with Gilson. We provide reliable and precise liquid handling components or complete systems that can be easily integrated into your core instrument, with support from a worldwide network you can depend on. Our philosophy is simple: build and support relationships that are as strong and reliable as our products.

Get to Market Faster with Our OEM Solutions

As a partner with Gilson, you will work closely with our research and development scientists and engineers and draw on their technical expertise to solve problems and develop your product. From proposal development to finished product and beyond, our team of experts is here to help you every step of the way.

Customization Capabilities

Draw on our proven experience and strong engineering and manufacturing capabilities to help develop your custom product. We offer expertise and assistance throughout the entire process—from development and integration of the product, to support and on-going training.

Highly Customizable Automated Liquid Handling Systems to Fit your Exact Needs

Gilson can provide standard liquid handling instruments to highly customized instrumentation across a wide variety of applications. Customization can be applied to simple, small components or to complete liquid handlers tailored to your unique specifications. Gilson has the liquid handling solutions to meet your requirements. Whether you want to aspirate, collect, dispense, inject, mix, or pump liquids, we can provide reliable, quality OEM products to fit your application.

[LEARN MORE](#)

Increase your Brand Awareness with Value Added Manual Liquid Handling Products

Gilson offers the ability to help increase your brand awareness with value added products. As an industry leader in manual pipetting, we can provide customized tools that deliver the precise control needed for accurate sample and reagent volume transfers. We offer a variety of pipettes in a range of ergonomic designs and volume sizes, as well as pipette controllers, tips, and accessories that enhance the pipetting experience and provide reproducible results. Our OEM/PL pipette is a genuine Gilson product providing the “Best Value” combination of quality, features, service, and price. Additionally, our Account Managers can help you align your company vision with product offerings that can be customized to increase your recognition in the market.

[LEARN MORE](#)

Automate Your Kits Through a Value Added Partnership (VAP)

The Value Added Partnership (VAP) is a shared cooperation in which Gilson maintains ownership of installation and support at your customers’ sites. Our VAP option is ideal for reagent manufacturers who wish to offer a complete, automated assay method to their customers without investing in sales or hardware support. In a VAP, you will work with our technical team to automate your method and validate your protocol on a specified Gilson liquid handling system. This shared cooperation allows you to benefit from our technical expertise and global coverage while increasing your kit and consumable revenue.

AUTOMATE YOUR LAB YOUR WAY

WORKING IN PARTNERSHIP TO ACHIEVE YOUR GOALS

Choose Gilson as your partner in the journey to add automation to your laboratory workflows. Let us help take the stress out of daily, time-consuming, tedious processes so you can focus on more value-added tasks.

Our wide range of solutions covers a variety of techniques, from sample handling to purification and extraction. Supported by flexible and intuitive software packages, your sample integrity is assured in terms of traceability, preservation, and provenance.

Our extensive support network is always on hand to provide applications assistance, instrument calibration, maintenance and repair.

Let Gilson guide you in evolving your processes to improve the accuracy and reliability of your results.

AUTOMATION

Sample Handling

THE EASIEST STEP TO AUTOMATION

Gilson liquid handling tools deliver the precise control you need for sample and reagent volume transfers, ensuring reproducible results while making life in the lab easier. From Chemical and Industrial applications requiring robust chemical compatibility to Life Science applications requiring zero cross-contamination, Gilson is uniquely positioned to provide optimized solutions, and you can keep on using your standard labware and consumables.

Supporting your Transition to Automation

Harness Gilson's expertise to help you transition from your manual methods to hybrid or fully automated processes, removing the anxiety associated with change. Our scientific experts are locally positioned to advise and implement a level of automation suited to your situation. Our application scientists can help you design your ideal solution using their knowledge of automating manual processes, the unmatched flexibility of our platforms and our ability to provide bespoke solutions just for you.

[REQUEST MORE INFORMATION](#)

LIQUID HANDLERS

Gilson liquid handling tools deliver the precise control you need for sample and reagent volume transfers, ensuring reproducible results while making life in the lab easier. Beginning with the legendary PIPETMAN® technology, our liquid handling tools have evolved with your needs. We offer completely automated liquid handling systems.

GX-271 Liquid Handler

The GX-271 Liquid Handler is a small footprint, medium capacity liquid handler and autosampler. This system offers small-to-large volume injection, fraction collection, and liquid handling capabilities. Its optional dynamic syringeless pumping system is capable of delivering microliters to hundreds of milliliters, with no change in hardware.

LEARN MORE

GX-274 Liquid Handler

The GX-274 Liquid Handler increases the throughput and efficiency of liquid transfers, serial dilutions, and other common tasks by processing up to four samples in parallel.

LEARN MORE

GX-281 Liquid Handler

This GX-281 Liquid Handler provides a versatile, large capacity platform that can be configured for injection, fraction collection, and re-injection as part of a semi-preparative or preparative HPLC purification system. With optional accessories, it can also be used as a flexible liquid handler for performing a wide variety of automated, unattended liquid handling applications.

LEARN MORE

gx-271

LIQUID HANDLER

GX-271 Liquid Handler delivers a compact footprint with medium-capacity automation for liquid handling and autosampling. Designed for versatility, it supports small- to large-volume injections, fraction collection, and advanced liquid handling workflows. With the optional dynamic syringeless pumping system, GX-271 can dispense anything from microliters to hundreds of milliliters without any hardware changes.

Innovative Injection Modules

The mid-throughput GX-271 can be equipped with the GX Direct Injection Module for seamless injections into HPLC or LC/MS systems. Its advanced injection port connects directly to the injection valve, significantly reducing void volume and minimizing carryover typically caused by calibrated tubing. This design supports a wide injection range—from 2 µL up to 25 mL. All injection valves feature a continuous flow-path design, ensuring system flow remains uninterrupted even during valve transitions from load to inject. This maintains stable pressure and consistent flow throughout your analysis.

Versatile, Space-Saving Design

Occupying just 23 inches of linear bench space, the GX-271 delivers an ideal balance of compact size, performance, and capacity. On-bed reservoirs provide access to up to four solvents without sacrificing rack positions. Its modular layout supports Code 20-, 200-, and 34X-series racks and accommodates a wide variety of tubes, vials, and microplates—adapting effortlessly to your laboratory’s workflow.

Advanced, Flexible Software Control

TRILUTION® Software enables multiple liquid-handling applications on a single system. Optimize workflows by processing samples in batch or sequential mode and accelerate method development through multiple elution options and parallel solvent testing. This powerful software ensures efficiency, flexibility, and precise control across a range of laboratory applications.

LEARN MORE

LIQUID HANDLING PUMPS

Gilson provides loading systems, allowing for sample transfers and other liquid handling tasks. These reliable systems can fit in any automated liquid handling platform or in HPLC semi-preparative and preparative systems.

MINIPULS® 3 Peristaltic Pump

High Performance Liquid Transfer

High-performance, low-pulse, peristaltic pump with interchangeable pump heads for delivering a diverse variety of liquids. Six different channel and flow rate configurations are available:

- Four standard models (1, 2, 4, or 8 channels): 0.3 µL/min to 30 mL/min
- Two high flow models (2 or 4 channels): 1 mL/min to 220 mL/min

[LEARN MORE](#)

VERITY® 4X20 Syringe Pumps

4020 Single, 4120 Dual with Tee, 4220 Dual

VERITY Syringe Pumps Provide Speed and Reliability

- Performs small- and large-volume, repetitive liquid transfers
- Available in single, dual, and dual syringe with tee configurations
- Compatible with all Gilson liquid handlers

[LEARN MORE](#)

GX Prep Solvent System

Bi-Directional Pump for the GX-271 and GX-281 Liquid Handlers

The GX Solvent System can switch from aspirate to dispense mode and can deliver liquids at flow rates up to 50 mL/min.

It can accommodate up to five different reservoir solvents.

[LEARN MORE](#)

verity®

4120

The VERITY® 4120 Dual with Tee Syringe Pump is equipped with two syringes that are user-selectable. The capacity of the left syringe must be greater than or equal to the right syringe. The instrument includes one valve to direct liquid from reservoir or probe (on the left) and a tee connected via junction tubing (on the right). Single syringe and standard dual (no tee) models are also available. The VERITY 4120 Dual with Tee Syringe Pump assures accuracy in sample transfers, dilutions, reagent additions, mixing, and other liquid handling tasks. It offers speed and reliability for liquid handling tasks.

VERITY® 4120 Dual with Tee Syringe Pump	
Technical Specification	Definition
Communication	USB
Dimensions (W x D x H)	22.6 x 17.1 x 26.9 cm (8.9 x 6.7 x 10.6 in.)
Precision	1%
Syringe Capacity	100 µL, 250 µL, 500 µL, 1 mL, 5 mL, 10 mL, or 25 mL
Software Control	PC control via USB and TRILUTION® LH or TRILUTION® LC Software
Tee	Type: Three port, no moving parts Diameter of channels: 1.5 mm Length of channels: 14 mm Angle between channels: 120° Liquid contact material: PEEK Dead volume: 51 µL
Volumetric Accuracy	±2% (10%-90% syringe capacity, water)
Weight	6.8 kg (15.0 lbs.)

VERITY® 4120 Dual with Tee Syringe Pump	
Description	Part Number
VERITY® 4120 Dual with Tee Syringe Pump	31130002

[LEARN MORE](#)

The compact MINIPULS® 3 Peristaltic Pump is a high-performance, low-pulse, peristaltic pump with interchangeable pump heads for delivering a variety of liquids—from biological to chemical. Six different channel and flow rate configurations are available.

Low-Pulse Liquid Transfer

Utilizing positive-displacement pump technology, liquid flows nearly pulse-free as a result of ten stainless steel rollers. MINIPULS 3 produces smooth flows with excellent accuracy and precision, even at high flow rates.

Flow Rates to Meet Your Needs

With a choice of six quickly interchangeable pump heads, you'll have a wide range of flow rates to use for your applications.

- Four standard models (1, 2, 4, or 8 channels): 0.3 µL/min to 30 mL/min
- Two high flow models (2 or 4 channels): 1 mL/min to 220 mL/min

Easy to Operate

MINIPULS 3 is easy to install, simple to operate, and easy to maintain. With a simple keypad control and easy-to-read LCD screen, start/stop, flow direction, increase/decrease flow rate, and prime functions are easily accessible. Remote start/stop is also possible.

Select the Right Tubing

The most suitable material according to your sample's chemical compatibility.

- Contains a large variety of internal diameters to reach desired flow rates.
- Features appropriate connectors and extension tubing.

ACCESSORIES

OPTIMIZE YOUR INSTRUMENTATION

Complementing durable and flexible instruments, Gilson accessories optimize instrumentation to fit application requirements for the ultimate solution.

VALVEMATE® II Valve Actuator

Increase the Flexibility of Your System

- Extends the capability of any chromatography or liquid handling system by offering options for solvent selection, column switching, and sample trapping
- Wide variety of valves, available in stainless steel or in biocompatible materials
- Fully controlled either via keypad or by TRILUTION® LC and LH Software

Orbital Shaker

The Orbital Shaker is specifically designed for on-line or off-line liquid handling, vortexing, and mixing. It is a fully functional, stand-alone instrument. This compact shaker fits on one rack position of a GX-281 Liquid Handler bed. The shaker provides a range of customer-controlled shaking (20 to 720 rpm), allowing vortexing on various vessel sizes and sample volumes.

Compatible with a Wide Range of Racks

The Orbital Shaker is compatible with all Code 200-series racks. A single rack attaches easily using set screws; rack placement is accurately guided by locator pins.

[LEARN MORE](#)

Racks

Gilson offers standard and custom SPE racks to meet the needs of any and all applications. A variety of vessels can be accommodated including tubes, vials, or microplates.

Standard and Custom Racks

Gilson offers standard and custom racks to meet the needs of any application. A variety of vessels can be accommodated, including tubes, vials, microplates, and microchips.

RackCount™ System

RackCount System overlays add numbering patterns to rack positions allowing you to quickly and easily locate specific samples or collected fractions on the bed of Gilson liquid handlers. The overlays are available in serpentine or non-serpentine numbering patterns.

PIPETMAX® RANGE

From compact to high-capacity, these precision-engineered platforms streamline bioassays, qPCR, and NGS workflows, delivering reproducible results and hands-free efficiency.

PIPETMAX® 268

PIPETMAX® 268 is a compact, benchtop automated pipetting platform designed for low- to medium-throughput workflows such as bioassays, qPCR plate prep, and NGS library preparation. With a small footprint and familiar, pipette-based operation, it's well suited for labs adopting automation without adding complexity. PIPETMAX 268 delivers reliable, repeatable liquid handling for core sample prep steps while fitting easily into existing laboratory spaces.

PIPETMAX® 278

PIPETMAX® 278 is a higher-capacity automated pipetting platform built for medium- to high-throughput applications that demand greater scalability and walkaway automation. Its expanded bed capacity supports parallel processing and more complex assay layouts, making it ideal for labs running larger batch sizes or increasingly sophisticated bioassay, qPCR, and NGS workflows. PIPETMAX 278 enables labs to increase throughput and automation depth as workflow demands grow.

Shared Capabilities

Both systems deliver accurate, reproducible liquid handling using standard PIPETMAN® DIAMOND Tips to reduce variability and maintain consistency across manual and automated steps. Each platform supports unattended operation and can be configured with optional accessories including magnetic bead racks, heating, shaking, chilling, and UV/HEPA protection, allowing labs to tailor automation to their applications while maintaining flexibility as workflows evolve.

SELECTION GUIDE

PIPETMAX® APPLICATION-BASED WORKSTATIONS

CHOOSE THE RIGHT PLATFORM FOR YOUR WORKFLOW

This guide helps you quickly identify the best PIPETMAX® system for your application, based on throughput, deck capacity, and workflow complexity.

BIOASSAYS

PIPETMAX® 268 Bioassay / PIPETMAX® 278 Bioassay

PIPETMAX® 268 Bioassay and PIPETMAX® 278 Bioassay systems provide precise, low-volume automated pipetting for bioassays such as ELISAs, dose-response curves, and IC₅₀ assays in 96- and 384-well formats. By automating workflows that are difficult to perform reproducibly by hand, they reduce variability while increasing consistency and throughput. Using standard PIPETMAN® DIAMOND Tips and built-in tip intelligence, the systems can be configured with optional temperature control modules to support automated, unattended assay preparation across a wide range of bioassay workflows.

[LEARN MORE](#)

qPCR PLATE PREP

PIPETMAX® 268 qPCR / PIPETMAX® 278 qPCR

PIPETMAX® 268 qPCR and PIPETMAX® 278 qPCR configurations deliver accurate and consistent automation for qPCR reaction setup and normalization workflows. Designed to protect sensitive assays, they support UV/HEPA filtration and guided setup tools such as the qPCR Assistant and Normalization Assistant to streamline plate preparation and reduce the risk of human error. With optional thermal, shaking, and chilling modules, the systems can be configured as unattended liquid handling platforms that help safeguard assay integrity while simplifying and standardizing qPCR workflows.

[LEARN MORE](#)

NGS LIBRARY PREP

PIPETMAX® 268 NGS / PIPETMAX® 278 NGS

PIPETMAX® 268 NGS and PIPETMAX® 278 NGS configurations provide automated magnetic bead-based cleanup for consistent, high-quality NGS library preparation workflows. Designed to automate AMPure® XP-based cleanup steps, they help reduce variability and hands-on time while improving reproducibility in sequencing-ready libraries. With intuitive, no-coding software and optional heater, shaker, and chiller modules, the systems can be configured as flexible, unattended solutions for a wide range of NGS preparation workflows, from low-throughput to higher-throughput applications.

PRE-CONFIGURED APPLICATION-BASED WORKSTATIONS FOR
AUTOMATING YOUR BIOASSAYS

Reliable bioassays start with precise, low-volume pipetting, something that’s difficult to achieve by hand. PIPETMAX[®] 268 Bioassay and PIPETMAX[®] 278 Bioassay systems automate ELISAs, dose-response curves, IC₅₀ assays, and 96-/384-well workflows to reduce variability and deliver more reproducible data with less hands-on time.

Bioassay Automation that Accelerates
Discovery

Standard PIPETMAN[®] DIAMOND Tips and automatic built-in tip intelligence optimize tip selection and usage depending on your protocol. This efficiency helps keep consumable costs low while maintaining the precision your assays require. With walk-away setup and flexible programming, your team can run more plates and focus on interpreting results, not preparing them.

Plus, you’re never doing it alone. Real Gilson scientists provide personalized training and workflow optimization so your assay automation performs reliably from day one and continues to scale with your research.

Key Benefits

- Example protocols included to help you start quickly
- Accurate low-volume dispensing that is difficult to achieve reproducibly manually
- Built-in tip intelligence optimizes tip usage to maintain speed and reduce consumable costs
- Uses standard PIPETMAN[®] DIAMOND Tips; no proprietary automation tips
- Optional heater, shaker, and chiller modules for improved mixing and temperature control
- Personalized support from real Gilson scientists for configuration, optimization, and scale-up

PIPETMAX[®] 268

PIPETMAX[®] 278

BIOASSAY SYSTEM INCLUDES:

- Two interchangeable pipette heads
- Tip reload blocks
- Selection of tube racks
- TRILUTION[®] micro Software
- Tip starter pack

PRE-CONFIGURED APPLICATION-BASED WORKSTATIONS FOR
AUTOMATING qPCR

Your results deserve more than “good enough.” qPCR is too important to leave to chance, and PIPETMAX[®] 268 qPCR and PIPETMAX[®] 278 qPCR deliver the precision and consistency only automation can provide. Built on the same trusted PIPETMAN[®] accuracy scientists rely on, these configurations help protect sensitive workflows and remove the variability that comes with manual pipetting.

Confidence You Can Quantify With Automation
Designed For qPCR

Every setup becomes simpler and more repeatable with tools designed specifically for qPCR. UV/HEPA protection helps safeguard your assays, while validated methods and guided setup tools—such as the qPCR Assistant—streamline plate preparation for users of all experience levels. The additional Normalization Assistant further reduces the risk of human error and stress by automating dilution and normalization steps.

When you need support, you are never on your own. Real Gilson scientists and application specialists are available to provide training, workflow optimization, and protocol guidance.

Key Benefits

- UV/HEPA protection helps reduce contamination risk and maintain a clean qPCR environment
- Automatic built-in tip intelligence minimizes unnecessary tip usage while maximizing speed and efficiency
- Optional chilling module helps preserve reagent integrity for sensitive workflows
- Optional thermal and shaking modules support temperature-sensitive and mixing-dependent steps
- Flexible programming options to fit your workflow, including:
 - ▮ Validated qPCR protocol for immediate, reliable setup qPCR Assistant for guided, step-by-step preparation
 - ▮ Normalization Assistant for automated dilution and normalization
 - ▮ Optional Protocol Builder for fully customized methods

PIPETMAX[®] 268

LEARN MORE ABOUT PIPETMAX 268 QPCR

LEARN MORE ABOUT PIPETMAX 278 QPCR

PRE-CONFIGURED APPLICATION-BASED WORKSTATIONS FOR
AUTOMATING NGS PREP

Reliable sequencing starts with consistent, high quality preparation, and that's where automation makes a meaningful difference. Library prep is often tedious, stressful, and prone to variability, especially during magnetic bead-based cleanup. PIPETMAX[®] 268 NGS and PIPETMAX[®] 278 NGS simplify these steps by automating the magnetic bead cleanup used in AMPure[®] XP bead-based workflows, helping you build consistent, sequencing-ready libraries every time.

Automated NGS Library Prep You Can Trust

Flexibility and ease of use are built into the workflow with example magnetic bead cleanup protocol you can tailor to your SOPs, supported by intuitive, no-coding software that any scientist can operate. Optional heater, shaker, and chiller modules give your lab the temperature and mixing control needed during critical ligation, resuspension, and enzymatic steps without adding complexity.

With Gilson, you will never automate alone. You get more than an instrument, you get real scientists who have run these workflows themselves, ready to help configure, optimize, and scale your library prep. Choose Gilson when your sequencing results depend on prep you can trust.

Key Benefits

- Includes an AMPure[®] clean up method with adjustable parameters to match your SOPs
- Automatic built-in tip intelligence to optimize tip usage and reduce unnecessary consumption
- Standard PIPETMAN[®] DIAMOND Tips; no costly proprietary automation tips
- Intuitive, no-coding software designed for scientists of all experience levels
- Bonus software wizards for qPCR and normalization plate preparation

extractmax™

PIPETMAX® 268 + EXTRACTMAN® = EXTRACTMAX™

EXTRACTMAX combines the tried-and-tested automation of Gilson’s personal pipetting robot, PIPIETMAX 268, with a manual, innovative magnetic bead extraction platform, EXTRACTMAN. A novel magnetic head is covered with a disposable bead capture strip that protects it from contamination, while a custom-designed plate provides a series of wells for the sample, three washes, and a final elution. Up to four samples can be treated in parallel.

Move Beads, Not Liquids – This is How it Works:

- The novel magnetic head captures the beads and moves them through a series of wash solutions
- Bind, wash, elute, and concentrate your molecule of interest in a single process
- Faster, gentler washing preserves weak interactions between molecules
- Capture weak binding molecules without disrupting unknown interactions
- Discover proteins you didn’t know existed

How it Works

Move Beads, Not Liquids

- The novel magnetic head captures the beads and moves them through a series of wash solutions
- Bind, wash, elute, and concentrate your molecule of interest in a single process
- Faster, gentler washing preserves weak interactions between molecules
- Capture weak binding molecules without disrupting unknown interactions
- Discover proteins you didn’t know existed

extractman®

A NOVEL PLATFORM FOR TARGET PROTEIN ISOLATION

EXTRACTMAN® offers a fast and gentle paramagnetic beads-based approach to isolating target proteins and is ideal for isolating elusive, weakly-bound protein complexes critical to protein interaction research.

Identifying Weak Proteins Interactions

Co-immunoprecipitation (Co-IP) is a common technique for observing protein-protein interactions; however, weakly-or transiently-bound species often go undetected as aggressive or repeated wash steps can result in a loss of these interactions. EXTRACTMAN differs from traditional magnetic bead-based co-IP techniques by using Exclusion-based Sample Preparation (ESP™) technology, making it ideal for capturing weakly bound protein complexes without exposing them to high shear forces from. Paired with non-porous magnetic beads, EXTRACTMAN enables high-yield, high-purity isolations without the need for long washing steps.

Rapid Isolation

EXTRACTMAN® uses surface tension and hydrophobic properties for ESP™-based extraction. This process gently and rapidly pulls bead-analyte complexes from sample to a series of washes and elute enriched and purified target compounds excluding unbound contaminants in a matter of seconds.

Ergonomic and Easy-to-Use

Slide-based extraction gently moves four samples in parallel through isolation with a simple slide of the handle. EXTRACTMAN has been used to rapidly isolate mRNA, DNA, and proteins from crude extracts using an assortment of commercial kits and reagent.

AUTOMATION

Sample Purification

A SMARTER WAY FORWARD: FLEXIBLE PURIFICATION SOLUTIONS

The goal of chromatographic purification is to achieve high recovery and obtain target compounds with high purity in the shortest time possible. Oftentimes with purification systems, you have to sacrifice one of the three (either purity, yield, or throughput) in order to achieve the best results for the other two parameters. However, with our systems, components, and software, the flexibility to create a purification system best suited to your needs allows you to find the balance between the three biggest pain points in purification.

Our solutions are dependable, flexible, and precise, and we're happy to help find the one that's right for you.

SCALING UP YOUR SYSTEMS, FROM RESEARCH TO PRODUCTION

INSTRUMENTS

We offer high performance liquid chromatography manual and automated solutions, available through purchase or leasing.

EXPERTISE

We secure your investment by providing expert advice, either from our application labs or in your lab.

SERVICES

From standard maintenance, qualification, and service, we guarantee the performance of your equipment.

Achieve accurate, reliable results with our purification chromatography systems and solutions.

Purify

- Isolate active ingredients or analytical standards with a high degree of purity
- Isolate impurities for further characterization

Fractionate

- Global partition of an extract to identify active compounds from sub-groups
- Partition to remove non-desirable molecule(s) from a complex mixture

Polish

- Increase purity of an already relatively pure compound

Capture

- Enrich a targeted compound from a large volume sample

Desalt

- Removal of salts from previous purification steps

High Performance Liquid Chromatography (HPLC) or Cartridge Based

Sample constituent are separated based on their relative affinities for the mobile phase and the solid stationary phase.

LEARN MORE

SELECTION GUIDE

PREP LC SOLUTIONS

HIGH PERFORMANCE LIQUID CHROMATOGRAPHY (HPLC)

Preparative high performance chromatography (prep HPLC or LC) plays a crucial role in many industries. Prep LC is used to isolate and purify desired compounds, removing impurities and contaminants that can affect the quality and performance of the end product. This is particularly important in industries where high-purity chemicals are required, such as the production of specialty chemicals, fine chemicals, pharmaceutical intermediates, and active ingredients (API).

VERITY® 271 HPLC System | VERITY® 281 HPLC System

High Throughput Purification Solutions for library building

- Large number of samples and fractions with VERITY® 271 and VERITY® 281 platforms (10 to 100s)
- Automated purification workflow including method screening, scout runs, purification runs, and fraction reinjection
- Open access capabilities
- Capability to use multiple HPLC columns with ID up to 50 mm

Automation – Flexibility – Open access

PEPTIDE PURIFICATION

PURIFICATION SYSTEMS FOR ANY PEPTIDE PURIFICATION METHOD

Gilson offers instruments and expertise that encompass a variety of peptide purification workflows.

VERITY® 271 LCMS System

Mass-Based Peptide Purification

The VERITY 271 LCMS system combines the power of High-Performance Liquid Chromatography (HPLC) with Mass Detection (MS) for conditional fraction collection.

Initial screening for peptide purification can be done using smaller columns for scouting, and then the LC optimized conditions can be scaled up, allowing researchers to target a specific peptide for purification. In addition, with UV-VIS detection, the optional single quad VERITY 1920 MS Detector with electrospray ionization (ESI) or atmospheric pressure chemical ionization (APCI) ion sources supports targeted fractions collection using selected ion monitoring (SIM) channels.

With a mass range of 10-2000 m/z, the VERITY 1920 MS helps you easily detect large molecules such as peptides and small proteins. Many biomolecules carry multiple charges with electrospray ionization so that even proteins of several tens of kDa can be measured within the 2,000 m/z range.

The method takes advantage of the software's powerful conditional fraction collection feature, which simultaneously combines UV-VIS signals and up to five MS channels to improve selectivity and purity.

LEARN MORE

ASPEC® 274 System

Parallel Cartridge-Based Purification Desalting for Proteomics

The peptides can be desalted after cell lysis and protein digestion using a 4-probe positive pressure Gilson ASPEC® 274 System, typically with C18 1 mL solid phase extraction columns prior to LCMS/MS analysis.

Small Length Oligonucleotide Purification

The small length oligonucleotides can be purified on cartridges. The parallel purification allows for higher throughput.

LEARN MORE

OLIGONUCLEOTIDE PURIFICATION

FLEXIBLE AND HIGH THROUGHPUT PURIFICATION OF OLIGONUCLEOTIDES

After the cleavage and deprotection steps, the purification of oligonucleotides is done by Ion pairing reversed phase (IP-RP) or ion exchange (IEX) liquid chromatography. After purification, the fractions are desalted by Size Exclusion Chromatography (SEC - Gel Filtration). This ideal purification system is able to deliver consistent and precise gradients to allow impurity removal while achieving a high-level recovery at various scales.

VERITY® Oligo Purification System

Purify and Control Oligonucleotides in One Continuous Production Run

With the VERITY® Oligo Purification System, you can now have a single platform for continuous purification and analysis of reagent-grade oligonucleotides then desalting of the controlled fractions.

A Single System to Save Space and Money

The VERITY Oligo Purification System can be configured to your needs and budget from a secure and robust purification platform up to a continuous production of oligonucleotides that can be operated 24 hours a day, 6 or 7 days a week.

TRILUTION® LC Software

TRILUTION LC Software is a user-friendly software for controlling our high-pressure liquid chromatography systems and automated liquid handling instruments. TRILUTION LC provides fraction collection capabilities, conditional logic collection, accurate fraction simulation, graphical drag-and-drop user interface, and graphical sample tracking. Built-in, software-based error handling conditions for each process stage can be customized for fully automated, unattended operation without fear of sample loss.

HIGH PRESSURE PUMPS

Gilson offers unsurpassed flexibility in pumping systems with an extensive product range and accommodations.

VERITY® 3011 Isocratic Pump

Ideal Pumping Solution for Chemical Reaction in Petroleum Applications, and GPC Cleanup in Environmental Applications

- High-pressure rating, up to 8700 psi (600 bar), for accommodating industrial level applications
- Quick-connect pump heads for simple maintenance and reduced downtime
- Flow rates from 10 µL/min to 10 mL/min and integrated touchscreen controller for convenient, stand-alone operation

[LEARN MORE](#)

**305 HPLC Pump
306 HPLC Pump**

Cost-Effective, Dependable Pumping Solution

- Available in isocratic, binary, and ternary configurations
- Interchangeable pump heads to accommodate flow rates from 10 µL/min to 200 mL/min at pressure up to 8700 psi (600 bar), depending on the pump head

[LEARN MORE](#)

322 HPLC Pump

Binary High Pressure Gradient Pump for Analytical to Semi-Preparative HPLC

- Accommodates flow rates from 0.30 mL/min up to 30 mL/min at pressures up to 4350 psi (300 bar)
- Compatible with HPLC columns from 4.6 to 20mm ID
- Variable high-pressure dynamic mixer

[LEARN MORE](#)

VERITY® 3240 Pump

Premiere High Performance Binary Gradient Pump for Semi-Preparative to Preparative Chromatography

- Large flow rate up to 150 mL/min and pressure range up to 6090 psi (420 bar)
- Designed to effectively work with preparative HPLC columns from 10 mm to 50 mm ID
- Ideal for high-throughput purification chromatography allowing for scaling up purification from milligrams up to tens of grams

[LEARN MORE](#)

333/334 HPLC Pumps

High Flow Binary Gradient Pump for Preparative HPLC

- Accommodates flow rates up ranging from 1 mL/min to 200 mL/min at pressures up to 3040 psi (210 bar) using columns up to 50 mm ID
- Features a variable-volume, dynamic mixer for optimized high pressure gradient performance

3011

MAKE YOUR LAB LIFE EASIER

The VERITY® 3011 Isocratic Pump is an innovative liquid delivery solution for chemical reaction monitoring in petroleum applications and for gel permeation chromatography (GPC) cleanup in environmental and food and beverage testing applications.

Simple Head Changing

The VERITY 3011 Isocratic Pump features a virtually pulse-free, stable solvent flow rate, ensuring stable flow delivery to detectors, and allowing for a wider range of application capabilities on one pump. The pump also features an easily interchangeable quick-connect pump head, making maintenance simple and reducing costly downtime.

The reproducibility and accuracy in reactions when using this pump, coupled with its low operation and maintenance costs, makes the VERITY 3011 Pump an ideal choice for many laboratories that pursue improved results and are trying to minimize costs, operators, and downtime.

The VERITY 3011 Isocratic Pump offers a stand-alone pumping system with high valued features:

- Quick-connect pump heads for easy installation, and simple maintenance
- High pressure rating for accommodating industrial level applications in the petroleum industry
- Integrated touchscreen controller for convenient, stand-alone operation
- Compact and stackable design that fits easily into a refrigeration unit or a fume hood
- Flow rates from 0.01 to 10 mL/min, depending on the pump head, and pressures of up to 8702 psi (600 bar)

The VERITY® 3240 High Pressure Binary Gradient Pump is designed for semi-preparative to preparative purification. It provides an economical and compact pumping solution for preparative purification.

Purify With Confidence

The VERITY 3240 Pump delivers reproducible and precise elution gradients to achieve repetitive isolations of targeted compounds with Gilson high-throughput purification platforms.

Scale Up Capabilities

The VERITY 3240 Pump has been designed to effectively work with preparative HPLC columns from 10 mm to 50 mm ID allowing for scaling up purification from milligrams up to tens of grams on the same Gilson automated purification platform.

Workhorse in the Laboratory

The large flow rate up to 150 mL/min and pressure range up to 6090 psi (420 bar) allows the VERITY 3240 Pump to cover most semi-preparative to preparative HPLC purification needs.

Safe and Efficient

The VERITY 3240 Pump has an optional leak detector to secure purifications. Optional inlet solvent selectors for up to four solvents per head support high throughput purification on different column types or for column regeneration.

AUTOMATION

Solid Phase Extraction

FLEXIBLE, EASY-TO-USE SOLID PHASE EXTRACTION SOLUTIONS

Solid phase extraction (SPE) has become the technique of choice for sample isolation/cleanup and trace enrichment before analysis due to its numerous benefits which include versatility, selectivity, and low solvent usage. The SPE process is based on a selective partition of the compounds of interest between a solid phase, the sorbent, and a liquid phase—the solvent.

Manual SPE procedures can be labor intensive and subject to human error, delays, or sample loss. These challenges have led to the development of automated SPE instruments that were pioneered by Gilson. We offer a variety of solid phase extraction systems using positive pressure and consumables that are adjustable based on your needs and can seamlessly integrate into your lab.

SOLID PHASE EXTRACTION

ANALYTICAL WORKFLOWS AND CLEANUP TECHNOLOGIES FROM SAMPLING TO DETECTION

Analysis workflows typically follow several key stages: sampling, homogenization, extraction, cleanup, detection, and quantification. The cleanup stage is critical for ensuring that trace-level analytes can be reliably detected in complex matrices.

Sampling	Extraction	Isolation Cleanup	Concentration	Analytical Chromatography Separation	Quantification
Ochratoxin A in Cereal and Spices	Liquid Extraction (Water/Methanol)	Immuno-Affinity Chromatography	NA	HPLC	Fluorescence
Paralytic Shellfish Toxin in Marine Snail	Liquid Extraction (Acidified Water at 100°C)	SPE (Graphitized Carbon)	NA	HPLC	MS/MS
PAHS in Dry-Cured or Smoked Meat Products	Hydrolysis and Liquid Extractions	SPE (Silica)	Evaporation	UHPLC	Fluorescence
Acrylamide in Seaweed Bread	Liquid Extraction (Water)	SPE (Mixed Module C18/SCX)	NA	UHPLC	MS/MS
Lipids Classes of Dairy Products after Digestion	Lipid Extraction	Fractionation (NLs, PLs, FFAs) by SPE (NH2)	Evaporation	GC (After Derivatization)	MS

Large Volume Water Analysis

- ASPEC® 274 Large Volume System**
- High throughput system for small- to large-volume SPE automation
 - Process four samples in parallel
 - Up to 32 samples on 3 mL and 6 mL cartridges
 - Segregated aqueous and organic waste
 - Compatible with LLE cleanup

LEARN MORE

Gilson's Guide to SPE Automation

This guide is both a resource and step-by-step troubleshooting handbook. This guide provides a background for the technique and explains the science of solid phase extraction (SPE). It also offers practical advice for automating workflows via Gilson SPE systems and software.

DOWNLOAD

Food Safety Analysis

- ASPEC® 271 System**
- Ultimate versatility system for basic and advanced SPE automation for 1 to 20 samples per day
 - Bed capacity: up to 108 samples on 1 mL cartridges, 60 on 3 mL, and 48 on 6 mL
 - Optional dual syringe for accurate transfer down to 10 µL
 - Optional injection for direct UHPLC or LC integration
 - Compatible with Gel Permeation Chromatography (GPC), liquid-liquid extraction (LLE), and Supported Liquid Extraction (SLE) cleanup applications

LEARN MORE

- ASPEC® 274 System**
- High throughput system for basic and advanced SPE automation for 10 to 100 samples per day
 - Process four samples in parallel
 - Bed capacity: up to 108 samples on 1 mL cartridges, 60 on 3 mL, and 48 on 6 mL
 - Compatible with MIP and SLE cleanup

Immuno-Affinity Columns (IAC) Automation

TRILUTION® LH Software has been specifically designed to support the specificities of IAC extraction, with the ability to improve interactions between the gel and the samples or the solvents to improve recoveries and reproducibility.

Mycotoxins

Gilson partners with R-Biopharm Rhône to deliver a seamless, automated cleanup workflow. By combining R-Biopharm Rhône IAC columns with Gilson's ASPEC® 271 and ASPEC® 274 systems, we are enabling faster, more consistent sample prep. With joint technical support, optimized methods, and dedicated system configurations, we are delivering more than a product — we are giving customers confidence, efficiency, and the freedom to focus on what matters most.

Per- and Polyfluoroalkyl Substances (PFAS)

Gilson's ASPEC Systems are listed as an example of an automation solution in the Annex V2.0 to the Guidance Document on Analytical Parameters for the Determination of Per- and Polyfluoroalkyl Substances (PFAS) in Food and Feed from the European Union Reference Laboratory for POPs (EURL POPs).

Application Note

AUTOMATING SAMPLE CLEANUP OF CEREALS AND SPICES FOR QUANTIFICATION OF OCHRATOXIN A

What if automating food safety testing didn't mean sacrificing accuracy? See how Gilson's ASPEC® 271 and R-Biopharm Rhône's OCHRARHONE® WIDE AUTO columns simplify ochratoxin A testing in cereals and spices. This validated, fully automated workflow delivers precise, reproducible results while freeing your team from tedious manual cleanup.

LEARN MORE

IMPROVE MANUAL SPE REPRODUCIBILITY

With a uniform and consistent flow rate, the ASPEC® Positive Pressure Manifold (PPM) improves solid phase extraction (SPE) reproducibility and recovery, even with high viscosity samples. It integrates easily into your lab's workflow and provides a fast and simple way to prepare samples for subsequent analysis by chromatography.

Compact and Easy to Set Up for Quick Operation

With its small footprint and only a single gas input, the ASPEC PPM is quick to set up and easily fits under fume hoods for extractions that use volatile solvents.

Positive Pressure for Reproducible Extractions

With its integrated pressure gauge and intuitive controller, the manifold provides better flow control among samples and between runs than traditional vacuum manifolds, providing greater confidence in your data. Positive pressure ensures that all samples will elute regardless of the viscosity level.

Parallel Clean Up

Compatible with both popular SPE cartridges and 96-well plates, the ASPEC PPM performs parallel extractions to increase throughput and productivity.

Optimize Workflow Throughput

By combining the ASPEC PPM with PIPETMAN® multichannel pipettes or PLATEMASTER® for 96-well SPE plates, get the guarantee of accurate and fast sample management and extraction.

One Unit, Four Formats

The base module is compatible with ASPEC SPE cartridges (1, 3, and 6 mL) and 96-well SPE plates for a high-throughput cleanup.

ASPEC® Positive Pressure Manifold	
Description	Part Number
ASPEC® PPM Base Unit	37012000
ASPEC® PPM Manual SPE Installation Kit	37417010

Tools and Resources

User Guide: Gilson Guide to SPE Automation

DOWNLOAD

The ASPEC® 274 System for positive pressure solid phase extraction (SPE) maximizes throughput by processing up to four samples in parallel. With its small footprint and multiple probes, it is the ideal choice for high-throughput SPE automation on 1, 3, or 6 mL cartridges. Combined with ASPEC® SPE Cartridges, it generates reproducible and efficient sample cleanup for clinical, forensic, doping, food, and environmental testing labs.

Parallel Processing for Maximum Efficiency

Four-probe Z-arm enables processing of four samples in parallel, increasing throughput and efficiency.

Positive Pressure for Reproducible Extractions

Positive pressure extraction with a unique sealing cap design increases reproducibility from sample to sample. The syringe pump delivers accurate volume dispensing at a reproducible flow rate.

Smart Design for Maximized Performance

Mobile rack technology enables multiple fractions elution and extractions per sample and additional fractions transfer in closed vials after SPE.

Intuitive Error Handling for Trusted Results

The syringe pump pressure-sensing module provides error handling for high cartridge pressure or clogged liquid lines and monitors pressure on each fluid path individually. Innovative jet wash rinse stations minimize carryover and cross contamination.

Versatile Software Control for Optimized Productivity

TRILUTION® LH Software allows for multiple liquid handling applications such as liquid-liquid extraction (LLE) and SPE on the same ASPEC system. Optimize throughput and efficiency by processing samples in either batch or sequential mode. Perform multiple elution and parallel solvent testing to quickly automate and optimize method development.

TRILUTION® LH Software

TRILUTION® LH Software is a comprehensive software package for seamless automation of all liquid handling (LH) and solid phase extraction (SPE) methods.

With its intuitive interface, simple drag-and-drop method creation, and application simulation, it combines flexibility and ease-of-use.

CONSISTENT PERFORMANCE, RELIABLE RESULTS

Get more reliable results with ASPEC[®] SPE Cartridges, ready-to-use, high-quality silica, and polymer cartridges. The ASPEC SPE Cartridges are available with ASPEC caps for cost-effective, automation-ready use on ASPEC automated solutions.

Key Features of Pre-Capped Cartridges for ASPEC Automation

- Run cartridges right out of the box, saving valuable time with no need for manual capping
- Remove potential health concerns with repetitive manual operations
- Run samples faster
- Prevent run stopping due to improperly installed caps
- Competitively priced versus uncapped cartridges with separated caps

Highly Selective Solutions

High performance solid phase extraction sorbents based on specific polymers or molecularly imprinted polymers (MIP) for sample cleanup before chromatographic analytical methods. AFFINIMIP[®] SPE and AttractSPE[™] are now available pre-capped for ASPEC automation.

	Mycotoxins Aflatoxins, Ochratoxin A, Patulin, ZON, DON
	Pesticides Glyphosate and Ampa Multi-Residues
	Endocrine Disruptors PFAs, Bisphenol A, PAHs
	Drug Residues Chloramphenicol and Nitrofurans, Amphetamines, Tetracyclines
	Desalting Peptides

ASPEC SPE Cartridges - Retention Mechanisms Selection

Sample properties, such as matrix type and compounds of interest solubility and polarity give a good starting point to identify the recommended sorbent and retention mechanism:

Analyte is soluble in			Analyte polarity	Recommended phases (SILICA BASED - POLYMERIC)
Aqueous	Sample Matrix Type	Aqueous	Non polar	ASPEC C18, ASPEC C8, ASPEC C4, ASPEC PHENYL, ASPEC CYCLOHEXYL, ASPEC DVB
			Non polar/ Moderately polar	ASPEC C18 NEC, ASPEC C8, ASPEC C4, ASPEC CYANO, ASPEC HLB
			Polar	ASPEC CYANO, ASPEC ACT. CARBON
		Aqueous/Organic	Cationic/Basic	ASPEC SCX, ASPEC SCX-2, ASPEC WCX
			Cationic/Basic (Neutral)	ASPEC X-SCX, ASPEC X-WCX
			Anionic/Acid	ASPEC SAX, ASPEC SAX-2, ASPEC WAX, ASPEC WAX-2
		Organic	Anionic/Acid (Neutral)	ASPEC X-SAX, ASPEC X-WAX
			Non polar	ASPEC C18, ASPEC C8, ASPEC C4, ASPEC PHENYL, ASPEC CYCLOHEXYL, ASPEC DVB, ASPEC HLB
Organic		Aqueous	Non polar	ASPEC C18, ASPEC C8, ASPEC C4, ASPEC PHENYL, ASPEC CYCLOHEXYL, ASPEC DVB, ASPEC HLB
			Cationic/Basic	ASPEC SCX, ASPEC SCX-2, ASPEC WCX
			Cationic/Basic (Neutral)	ASPEC X-SCX, ASPEC X-WCX
			Anionic/Acid	ASPEC SAX, ASPEC SAX-2, ASPEC WAX, ASPEC WAX-2
			Anionic/Acid (Neutral)	ASPEC X-SAX, ASPEC X-WAX
		Organic	Moderately polar	ASPEC SILICA, ASPEC FLORISIL, ASPEC ALUMINA, ASPEC CYANO, ASPEC DIOL NEC
			Polar	ASPEC CYANO, ASPEC DIOL NEC

SHOP NOW

GPC Cleanup is a simple but efficient clean-up technique to eliminate matrix effect and preserve your GC or LC column life by discarding high molecular weight interfering substances contained in sample extracts and recovering analytes of interest into a pure fraction of solvent. The VERITY® GPC Cleanup system is a fully automated cleanup system which makes it an ideal tool to minimize risks to the users and improve reproducibility.

Fully Automated System to Improve Efficiency and Reliability

GPC post-extraction cleanup is typically used prior to analysis of contaminants such as pesticides, semi-volatiles, PAHs and PCBs, and pharmaceuticals in environmental samples, food products, and animal tissue

High Capacity

- Automated cleanup of up to 80 sample extracts

Complete Workflow Integration

- Large choice of racks for sample extracts and different evaporation vessels into which compounds are collected

Compliance with Government Agency Guidelines and Methods

- Meets government requirements for GPC cleanup - USEPA, USDA, USFDA, USGS, USDI, Centers for Disease Control (CDC), Canadian Food Inspection Agency (CFIA), European Union (EN 1528, 12393, DFG S19), AOAC International, etc.
- An optional VERITY® 1741 UV-Vis Detector (200-800 nm) is available to ensure GPC column calibration in compliance with GPC post-extraction guidelines when requested

All Under TRILUTION® LC Software Control: Easy to Use with Built-in GPC Method

The VERITY GPC System is controlled by the powerful TRILUTION LC software which contains pre-programmed methods for GPC post-extraction cleanup. The software error handling and shutdown methods help to minimize solvent waste and sample loss.

High Flexibility

- Compatible with various columns from low pressure glass columns to higher pressure Stainless steel columns with the VERITY® 3011 Isocratic Pump (up to 10 mL/min, 600 bar (8702 psi))
- Can also be used for other chromatography applications as an Isocratic HPLC system from analytical to semi-preparative scale

Sample Integrity

- The septum piercing capability option can maintain the integrity of a sample extract by using closed tubes
- Overfill of the sample loop is not required, which helps to conserve the sample
- Independent flow paths between injection and fraction collection avoids cross contamination

The VERITY® GPC Cleanup System is configured with a GX-271 Liquid Handler equipped with a 3-way collection valve, GX Direct Injection Module, VERITY® 4020 Single Syringe Pump, VERITY® 3011 Isocratic Pump, TRILUTION® LC Software, and an optional VERITY® 1741 UV-VIS Detector

CLARIFY YOUR SAMPLES AND EXTEND THE LIFE OF YOUR ANALYTICAL SYSTEMS

For sample volumes up to 100 mL, the range of Gilson SupaTop™ Syringe Filters provides a quick, convenient, and reliable method of clarifying liquids intended for further analysis, such as HPLC injection to combat particulate clogging of columns.

Gilson SupaTop Syringe Filters are available in two sizes, 13 or 25 mm, each with a choice of porosity of 0.22 µm or 0.45 µm.

Maintain Sample Integrity

- Pigment-free and sealant-free polypropylene housing
- HPLC-certified filters with low levels of UV-absorbing extractables

Save Time and Avoid Error

- Color-coded syringe filters to quickly identify membrane and porosity used
- High burst strength and durable construction

A Membrane for All Your Needs

- The filter membrane should not interfere with the sample or bind proteins or other macromolecules
- The table at right provides a good starting point to identify the type of membrane used by application

MEMBRANE APPLICATIONS	
Application	Membrane Type
(U)HPLC solvents	PTFE or Nylon
Aqueous solution	All except PTFE
Iconic chromatography	PES or PTFE
Protein analysis	PES or PVDF
Environmental and food analysis	PTFE or Nylon
Clinical or toxicological analysis	PES
ICP/AAS metals analysis	PES or Nylon
Cell or Tissue culture media	PES

Membrane	Properties	Color Code	Pore Size	13 mm Diameter		25 mm Diameter	
				Part No.	Pack of	Part No.	Pack of
PES	Polyethersulfone (PES) is widely used for the clarification of biological samples. This low binding membrane is able to resist surfactants and hydrocarbon oils but is not suitable for use with low-polar organic solvents or aromatic hydrocarbons.		0.2 µm	ANR1322 ANR1322D	100 1000	ANR2522 ANR2522C	100 500
			0.45 µm	ANR1345 ANR1345D	100 1000	ANR2545 ANR2545C	100 500
MCE	Mixed Cellulose Esters (MCE) contain a blend of cellulose acetate and nitrocellulose fibers providing a more resilient membrane than CA for aqueous-based filtration. Higher binding than pure CA.		0.2 µm	ANM1322 ANM1322D	100 1000	ANM2522 ANM2522C	100 500
			0.45 µm	ANM1345 ANM1345D	100 1000	ANM2545 ANM2545C	100 500
NYLON	Polyamide (Nylon) is a popular membrane with superior chemical compatibility as compared to CA or MCE. Able to filter aqueous or mild organic solvents, this membrane is naturally hydrophilic with low extractables.		0.2 µm	ANN1322 ANN1322D	100 1000	ANN2522 ANN2522C	100 500
			0.45 µm	ANN1345 ANN1345D	100 1000	ANN2545 ANN2545C	100 500
PVDF	Polyvinylidene Fluoride (PVDF) exhibits great chemical resilience being non-reactive to many solvents, acids, and bases. Appreciated for its low protein binding properties this membrane is used in biological sciences and its wide chemical compatibility range makes it ideal for HPLC sample preparation ahead of injection.		0.2 µm	ANV1322 ANV1322D	100 1000	ANV2522 ANV2522C	100 500
			0.45 µm	ANV1345 ANV1345D	100 1000	ANV2545 ANV2545C	100 500
PTFE	Polytetrafluoroethylene (PTFE) has the highest chemical compatibility rating of these filters. Being naturally hydrophobic this membrane is most suited to the clarification of organic solvents and for air venting processes. Not suitable for aqueous sample filtration without pre-wetting.		0.2 µm	ANP1322 ANP1322D	100 1000	ANP2522 ANP2522C	100 500
			0.45 µm	ANP1345 ANP1345D	100 1000	ANP2545 ANP2545C	100 500

LAB ESSENTIALS

Liquid Handling

TRUSTED RESULTS BEGIN WITH TRUSTED LIQUID HANDLING TOOLS

Gilson liquid handling tools deliver the precise control you need for sample and reagent volume transfers, ensuring reproducible results while making life in the lab easier. Beginning with the legendary PIPETMAN® technology, our liquid handling tools have evolved with your needs. Ergonomically designed with scientists like you in mind, we offer durable solutions from manual, single channel units to completely automated liquid handling systems.

SELECTION GUIDE

LIQUID HANDLING

This Pipetting Selection Guide helps you quickly compare Gilson pipetting solutions based on throughput, comfort, and application needs. It spans the full workflow, from single channel and multichannel pipettes to 96-channel and automated systems, making it easy to identify the right tool for accuracy, ergonomics, and productivity at every stage of your lab’s evolution.

PIPETTE FAMILIES

Air Displacement
Mechanical or Electronic Pipette

Uses an air cushion to move liquid. Ideal and accurate for standard aqueous applications. In mechanical models, the piston is user-driven; in electronic models, a motor drives the piston, requiring virtually no force. Accuracy may vary with temperature, pressure, or liquid viscosity.

Positive Displacement
Pipette

Uses a built-in piston inside the tip for direct contact with the sample. Perfect for viscous, volatile, or sticky liquids, ensuring accuracy and protection.

From positive-displacement to air displacement or fixed volume to variable volume, how do you go about choosing the right pipette? Watch our video to learn what factors to consider when choosing the perfect pipette for your lab.

M96

Science moves fast, and your time at the bench is valuable. PIPETMAN® M96 is a convenient and intuitive electronic pipette designed for high-throughput pipetting on 96- and 384-well microplates. With advanced ergonomics, a guided touchscreen, and smart accessories to maximize bench space, it turns repetitive pipetting into a process that feels natural, seamless, and reliable.

A 96-Channel Motorized Pipette Designed Around You

PIPETMAN M96 isn't just a tool, it's built to move with you. Its intuitive touchscreen guides you through functions and steps, making complex protocols feel simple and adjustments effortless. Every transfer feels precise, consistent, and under your control.

Flexible, Like Your Workday

No two labs, or scientists, work the same way. That's why PIPETMAN M96 adapts to your workflow, fitting seamlessly with SLAS-standard labware and PIPETMAN® DIAMOND Tips, without adding extra costs. Optimized accessories keep your workspace organized without taking up more room, so you can focus on your science instead.

Confidence You Can Count On

When results matter, consistency is everything. Backed by the proven reproducibility of Gilson solutions, PIPETMAN M96 ensures accuracy and reliability in every plate. More than improving productivity, it gives you the peace of mind to focus on the discoveries ahead.

MAKE YOUR LAB AS SMART AS YOUR SCIENCE

TRACKMAN® Connected is a tablet with exclusive applications and accessories that make pipetting on different labware more reliable, improving the efficiency and traceability of your experiment.

Boost Your Experiment Reliability

When paired with PIPETMAN® M Connected, the installed PipettePilot® app guides you through your pipetting protocol. The app displays where, when, and how much to pipette with real-time interactions to prevent errors.

Get Immediate Reproducibility

With the digitally documented protocol, your team can be confident that a protocol is being executed the same each time.

Improve the Traceability of your Experiment

Integrate connected tools into your protocols in a safe and convenient way. TRACKMAN Connected offers complete traceability of your experiments by recording pipetting actions and environmental conditions.

Access Pipette Analytics and Calibration History

PipetteScope® informs you exactly when your pipette needs to be calibrated. Through the app, you can easily request a calibration appointment and also view service history reports in one central location. PipetteScope gives you instant access to the pipette usage analytics as well as access to the user guide.

Download App

Pair it with
PIPETMAN® M Connected

Explore new possibilities in protocol execution assistance, traceability, and data acquisition through its Bluetooth® connection to Gilson applications.

For more information about PIPETMAN M Connected, refer to [page 60 to 63](#).

Make Pipetting Easier for Your Molecular Biology Applications

We've worked closely with QIAGEN to program their gold-standard protocols into TRACKMAN Connected to reduce errors and bring greater traceability to your molecular biology applications.

Depending on your protocol needs, we have three TRACKMAN Connected Starter Kits available: Single Channel, Multichannel, and Pro. Each starter kit includes PIPETMAN M Connected pipettes, TRACKMAN Connected tablet and accessories, and tips.

WATCH VIDEO

Contact your local [Gilson sales representative](#) to find out about the availability of this product in your country.

Inside Your Kit

Tablet with PipettePilot® and PipetteScope® Apps

Interact with all your apps at the bench with the tablet included in your kit. The tablet comes preloaded with PipettePilot to create and track pipetting tasks. The app displays where and when to pipette with real time interactions to prevent pipetting errors and provides you with a report for complete traceability of your experiment. Our other application, PipetteScope, helps you keep tabs on your pipette last calibration, user's guide, and other useful pipetting metrics.

Environment Sensor

Monitor temperature, pressure, and humidity during your experiment with your environment sensor.

Benchtop Pipetting Accessories

Get all the accessories to integrate your tablet at the bench in a safe way: microplate holder, tempered glass screen protector, microplate adapter, and strip adapters.

Full range of accessories can be found on [page 74](#).

PIPETTE SMARTER. REPORT FASTER. CONFIDENTLY.

PIPETMAN® M Connected is an electronic, Bluetooth®-enabled pipette that offers accuracy and precision in both standard and repetitive pipetting modes. Requiring virtually no pipetting forces to aspirate and dispense samples, PIPETMAN M Connected helps reduce pipetting fatigue and increase pipetting efficiency. PIPETMAN M Connected is available in 20 models, covering a volume range from 0.5 µL to 10 mL for single channel models, and 0.5 µL to 1200 µL for multichannel models.

Make Manual Processes Verifiable

With PIPETMAN M Connected, explore new possibilities in protocol execution assistance and data acquisition through the Bluetooth® connection to Gilson applications. The pipette interacts in real time with your TRACKMAN® Connected system for increased accuracy and efficiency in both standard and repetitive modes.

GILSON SOFTWARE & APPLICATIONS

PipettePilot®

The PipettePilot app comes preloaded on the TRACKMAN Connected tablet. The app displays where and when to pipette in real time to prevent pipetting errors. The app also provides you with a report for complete traceability of your experiment.

PIPETMAN M Connected Software

Executing custom protocols has never been easier. PIPETMAN M Connected Software allows you to create, save, and transfer up to ten custom protocols into PIPETMAN M Connected.

PipetteScope®

With PipetteScope, know exactly when your pipette needs to be calibrated, request a calibration appointment, and view service history reports, all in one location. Additionally, with the app, you'll gain visibility into your pipette's usage analytics and get quick access to user's guides.

pipetman®

M

GUARANTEED PERFORMANCE WITH OUTSTANDING ACCURACY

The PIPETMAN® M electronic pipette combines the simplicity of a mechanical pipette with the consistency of an electronic liquid handling tool. The PIPETMAN M range has been designed for guaranteed accuracy and precision in both standard and repetitive modes for reliable sample preparation.

On-Target Performance

Trust your results with guaranteed performance in both standard and repetitive pipetting modes.

Pipetting Comfort

Lightweight and perfectly balanced with low ejection and volume setting forces, for hours of pipetting comfort.

Ease-of-Use

With a streamlined user interface and four pipetting modes, control of your sample prep is at your fingertips. Switch to custom mode to execute your own protocol transferred from the PIPETMAN M Software.

MyPipetman®

SELECT

PRECISION THAT ADAPTS TO YOUR LAB

Ergonomic, safe, and reliable, MyPIPETMAN® Select offers volume setting choice and optional text personalization on the handle for an optimal use in various protocols.

Set and Secure the Volume your Preferred Way

The unique Trilock™ volume-locking system enables you to choose different positions when setting the volume:

- Free volume setting position for quick and effortless volume adjustment
- Light ratchet volume setting for precise volume adjustment
- Volume locked position for secure pipetting

With the Trilock system, the volume is adjusted simply by turning the push button of the pipette.

Ergonomic Design

Lightweight and well-balanced, MyPIPETMAN Select has an elegant design with a textured effect for a better grip.

With no compromise on quality and performance, the built-in ejection system provides reduced tip ejection forces. This patented ejection system reinforces the pipette's ergonomics for convenient use throughout the day.

Personalize your Pipette for Optimal Use

MyPIPETMAN Select can have their handles printed on demand. Identify your pipette to avoid any risk of contamination by dedicating it to a specific liquid or workflow step and improve your lab Lean Management process.

MyPIPETMAN Select can be personalized with a special text. Part numbers are finishing with SP (Select Personalized) instead of S (Select). Please contact your [Gilson Account Manager](#) for special text printing and SP part numbers.

Extra Customization for Your MyPIPETMAN®.

For identification or more convenient use, this colored window will provide extra customization to your MyPIPETMAN®. Six colors are available, and you can easily replace the colored window at your convenience.

MyPipetman®

ENTERPRISE

A UNIQUE COMBINATION OF FUNCTIONAL CHOICES AND PIPETTE PERSONALIZATION

MyPIPETMAN® Enterprise is a series of fully autoclavable pipettes that include technical and personalization options. Unique, reliable, and ergonomic, they are the right solution for enterprises or industries that are looking for better efficiency and performance in daily activities through various applications and workflows.

Design Your Very Own Gilson Pipette Series

MyPIPETMAN Enterprise offers several customization options to ensure efficiency and answer your pipetting needs within various workflows.

Technical Features

Choose your preferred technical features to optimize the use of your pipette and increase overall productivity in the lab:

- With or without volume locking system (Trilock™ system or simple ratchet)
- Reduced or standard pipetting and ejection forces
- Metal or plastic tip ejector (from P2 to P1000 single channel models)

Colors and Extra Personalization Options

Color choices and printing options on your pipette allow for better organization and identification within your applications:

- Handle and lower parts color choices
- One side of the pipette can be laser-printed

Store Your Pipettes On Our CARROUSEL™ Pipette Stand

The CARROUSEL™ Pipette Stand holds up to seven Gilson single or multichannel pipettes, protecting them from contamination.

Full range of accessories can be found on page 74.

INCREASED COMFORT AND PRODUCTIVITY

Designed for performance and comfort, PIPETMAN® L offers a comprehensive range of models, adapted to all your needs.

Convenient Use

Lightweight and balanced, PIPETMAN L combines an ergonomic design with minimized pipetting forces, giving you the ability to pipette longer without fatigue.

Right-handed or left-handed? No problem. Adjust the location of the tip ejector to the most comfortable position for you.

Secure Pipetting

Reduce pipetting errors and avoid accidental volume changes during pipetting cycles with a true volume-locking mechanism for improved accuracy and precision. PIPETMAN L variable volume models are all fully autoclavable without disassembly for maximum convenience and protection from cross-contamination.

Extended Range & Tip Compatibility

Available as a fixed or variable volume, the PIPETMAN L line covers a full volume range from 0.2 µL to 10 mL for single channel models, and from 0.5 µL to 1200 µL for multichannel models. Precise, accurate, and reliable, they can be intensively used with confidence in many applications.

Four PIPETMAN L multichannel models (model name ending with VR), covering a volume range from 20 µL to 300 µL, are equipped with V-rings at the bottom of the tip holders for a proper fit with most tip brands (*using the Rocky Rack technique is recommended*).

Store Your Pipettes On Our CARROUSEL™ Pipette Stand

The CARROUSEL™ Pipette Stand holds up to seven Gilson single or multichannel pipettes, protecting them from contamination.

L

COMFORTABLE PIPETTING WITH SECURED FIXED VOLUME

The PIPETMAN® L Fixed pipettes offer the same comfortable, lightweight design as the variable volume models with a fixed volume that reduces the risk of any volume error during pipetting. This makes them an ideal choice for clinical diagnostics, quality control, and any routine testing applications even for non-trained lab technicians. Fifteen models of the air displacement-based PIPETMAN L Fixed pipettes are available, covering a volume range of 1 µL to 5 mL.

RECOGNIZED RELIABILITY AND PROVEN DURABILITY COMBINED WITH EASY PIPETTING AND HANDLING

Recognized as the pipetting standard for its reliability and proven durability, PIPETMAN® combines legendary accuracy, precision, and durability with easy pipetting and handling.

Legendary Performance

Accurate and precise, PIPETMAN® air displacement pipettes are recognized worldwide as the standard in pipetting.

They come in a large range of volumes, including single and multichannel models, allowing you to handle various sample types with confidence.

Easy Pipetting

PIPETMAN feels like the PIPETMAN® Classic but with lower forces and enhanced standard pipetting habits.

Built-to-Last and Convenient

Made of resistant materials, PIPETMAN offers premium durability. Built-to-last, it is the economical solution for years of pipetting.

Simple to Maintain

Routine cleaning and maintenance are all that is required to keep PIPETMAN in top condition for years. The PIPETMAN design allows for easy access to user-serviceable parts, along with a fully autoclavable tip holder and ejector.

Store Your Pipettes On Our SINGLE™ Holder Pipette Stand

Convenient option for holding a single or multichannel PIPETMAN® pipette, protecting the pipette from contamination without taking up any precious bench space.

CytoPur™ and CorePur™ Reagent Reservoirs

Our Reagent Reservoirs meet the highest quality standards. They come in two options: CorePur™, manufactured in ISO 8 conditions, offers efficiency and reliability for everyday workflows and CytoPur™, sterile (SAL 10⁻⁶), free of pyrogens, DNase/RNase, and DNA/RNA ensures ultimate purity for critical applications. Both options provide seamless compatibility with pipettes and high throughput pipetting systems.

CARROUSEL™ Pipette Stand

Keep your pipettes safe from bumps and contamination with this stylish, compact stand.

Designed to hold up to seven Gilson pipettes, it saves valuable bench space and keeps your workspace organized and efficient. Durable, practical, and always within reach — your lab routine just got easier.

Ordering information	
CARROUSEL, stand for 7 pipettes	F161401

SINGLE™ Pipette Holder

Holds single or multichannel PIPETMAN®, PIPETMAN® L, MyPIPETMAN®, and MICROMAN® E models.

Adheres to any smooth, dry surface, keeping pipettes upright while preventing liquids from running inside the shaft.

Ordering information	
Single Pipette Holder	F161406

TRIO™ Pipette Stand

Holds and protects up to three PIPETMAN®, PIPETMAN® L, MyPIPETMAN®, or MICROMAN® E pipettes, helping you keep your workbench organized and efficient.

Ordering information	
TRIO Pipette Stand for 3 pipettes	F161405

Learning Hub

The Gilson Learning hub is a searchable content library with information to help support your research. Browse through articles, videos, application notes, webinars, and other resources related to your applications.

Other Little Things That Help

Gilson offers an array of tools and kits to make your lab pipetting easier. Need a way to simplify tracking of individual pipettes? Want to calibrate your PIPETMAN yourself? We have that and more because we know that it's the little things that can improve your lab routines.

PIPETMAN COMFORT HANDLE

The ergonomically designed PIPETMAN® Comfort Handle attaches to any PIPETMAN with the classic design to improve comfort and reduce pipetting fatigue. The handles are easy to personalize with the PIPETMAN Comfort Handle labels.

Ordering information	
COMFORT HANDLE pack of 3, blue	F161486

PIPETTE TIPS

TIPS CREATED TO MAXIMIZE RELIABILITY

Sample integrity is central to everything we do and it starts with high-quality materials. Designed specifically for PIPETMAN® pipettes, our tips are manufactured from premium materials in a sterile, clean-room environment to prevent contamination that could impact results. While it's often assumed that any well-fitting tip won't affect accuracy, ISO 8655 makes it clear: only pipettes and tips from the same manufacturer ensure consistent, lot-to-lot performance, helping reduce variability and eliminate extra calibration steps.

AIR DISPLACEMENT TIPS

PIPETMAN® DIAMOND Tips

PIPETMAN® DIAMOND Tips are precision-engineered for perfect fit and peak performance with PIPETMAN pipettes and are compatible with Gilson instruments. As part of the ISO 8655-calibrated pipette system, they deliver reliable, reproducible results every time.

Made from pure polypropylene in clean-room conditions, they ensure accurate volume delivery, complete dispensing, and freedom from detectable contaminants. They are available as autoclavable, sterile (SAL 10⁻⁶) or sterile filter options, certified free of DNA, RNA, DNase, RNase, ATP, and endotoxins.

PIPETMAN® EXPERT Tips

Universal-fit PIPETMAN EXPERT Tips are designed to be compatible with leading pipette brands. This allows laboratories to stock a single type of tip, saving time, costs, and bench space.

Gel Loading Tips are perfect for precise sample loading in electrophoresis and are available in round or flat designs. Autoclavable or sterilized (SAL 10⁻³), they are free of human and bacterial DNA, DNase, RNase, and pyrogens, and are compatible with real-time PCR.

AmpliPur® Expert Tips

AmpliPur® Expert Tips (sterile version, SAL 10⁻⁶) are certified free of DNA, RNA, DNase, and RNase, ensuring reliable results ideal for microbiology, molecular biology, biomedicine, cell culture and biobanking.

Compatible with most pipettes on the market and compliant with ISO 8655 standards, these tips are manufactured from recyclable materials. AmpliPur Expert Tips combine durability, performance, and excellent value for money.

POSITIVE DISPLACEMENT TIPS

Capillary Pistons

Capillary Piston Tips are designed for use with MICROMAN® positive displacement pipette and are ideal for viscous, volatile, or hazardous liquids. Their syringe-like design prevents contamination and delivers accurate, reproducible results, even in narrow or deep tubes.

DISTRITIPS®

DISTRITIPS® are designed for DISTRIMAN® positive displacement repeater pipettes and provide accurate, reliable dispensing of difficult samples. Made from dye-free polypropylene, they eliminate the risk of chemical contamination.

ONE TIP. TOTAL COMPATIBILITY.

Affordable Automation Without Compromise

Unlike many automated liquid handlers that require proprietary consumables, Gilson's PIPETMAX®, PIPETMAN M96, and PLATEMASTER systems use the same trusted PIPETMAN® DIAMOND Tips scientists rely on for pipetting. You can automate critical workflows, like qPCR, normalization, or ELISA, without the added cost of special automation-only tips.

pipetman®

DIAMOND TIPS

HIGHEST QUALITY TIPS FOR SUPERIOR RESULTS

Trust Gilson's PIPETMAN® DIAMOND Tips to deliver the accuracy and precision your experiments demand. PIPETMAN DIAMOND Tips fit all Gilson instruments: no extra cost, no extra storage, no guesswork. One tip type covers it all, helping your lab save both time and money.

Guaranteed Results for all your Gilson Instruments

PIPETMAN DIAMOND Tips are designed to fit your PIPETMAN®, PIPETMAX®, PIPETMAN® M96, and PLATEMASTER® perfectly. Using PIPETMAN DIAMOND Tips in conjunction with your Gilson products guarantees maximum accuracy and precision.

Affordable and Versatile For Every Application

Your needs, budget, and tip consumption vary according to your specific research activity. With our extensive range of packaging, PIPETMAN DIAMOND Tips are an affordable option for every lab and every application.

Contamination-Free

Our tips are made of the highest-grade material within a fully traceable clean room environment, ensuring each tip is free of detectable DNA, RNA, DNase, RNase, ATP, and Endotoxins (Pyrogens). From mold to bench, they are traceable, and certified to meet the most stringent demands in a variety of applications.

WIDE RANGE OF TIP PACKAGING

TIPACK™

Compact, ergonomic, and eco-friendly by design, TIPACK™ enables the ROCKY RACK™ technique with a 180° hinged lid for easy tip loading on any pipettes.

Fully autoclavable, TIPACK is also available in sterilized and filter tip options.

TOWERPACK

A quick, easy, and affordable rack refill system that saves 60% bench space and uses 70% less plastic than standard racks.

The universal reload box supports one-hand operation, is fully autoclavable, and available sterilized, bringing efficiency, sustainability, and convenience to the lab.

REFILL VERSION

Individually wrapped tip racks provide a convenient, clean, and eco-friendly solution for tip storage.

Ready to use—simply peel the lid and place the rack into an empty box—they use 45% less plastic than standard racks. Fully autoclavable and available in sterilized or filter options, they deliver practicality without compromising quality.

RELOAD PACK

The fastest way to refill an empty box, using 70% less plastic in recyclable, eco-friendly packaging.

Easy to store and space-efficient on the bench, it's both affordable and convenient. Fully autoclavable, it provides a practical and sustainable solution for everyday lab use.

EASYPACK AND ECOPACK

Buy in bulk and save by reloading tips into empty racks.

Sealed bags with a rapid-sealing strip allow easy access while helping prevent contamination and reduce waste. Fully autoclavable, they are available as EASYPACK (5 bags × 200 tips) and ECOPACK (10 bags × 1000 tips).

STERILPACK

Individually wrapped, sterilized tips provide full protection from contaminants until the moment of use.

Each tip is sealed in medical-grade plastic with guaranteed sterilization for up to five years and supplied in packs of 400 individually wrapped tips.

UNIVERSAL FIT PIPETTE TIPS

Universal fit PIPETMAN® EXPERT Tips are designed to fit leading pipette brands, allowing you to stock one brand of tips saving time, money, and bench space. PIPETMAN EXPERT Gel Loading Tips are ideal for accurate sample loading of wells in gel electrophoresis. Choose from round or flat tips, non-sterile or sterilized. Color-coded packaging corresponds to industry standards for color matching to respective Gilson pipette models.

Certified Contaminant Free

These tips are certified free of human DNA, RNases, DNases, PCR inhibitors, and pyrogens.

Gilson Universal Fit Tips

Designed to fit perfectly and provide the best results with Gilson pipettes, the universal design of PIPETMAN EXPERT Tips allows them to be used with most leading pipette brands. Additionally, because of the universal fit, PIPETMAN EXPERT Tips allow you to stock up on one brand of tips with practical packaging options, saving you time, money, and bench space.

Space Saving Environment Friendly Packaging

The Towerpack and MegaPack configurations allow labs to store more tips using less space on the bench. Less packaging material is used and the plastic is recyclable.

Gel Loading Tip Solutions

Receive maximum accuracy and the best possible results when using PIPETMAN EXPERT long, round tips and the specially patented flat gel loading tips.

WIDE RANGE OF TIP PACKAGING

TIPACK™

Filter, autoclavable, and sterilized, TIPACK™ features a uniquely designed dual-purpose lid. It can be hinged for easy opening and closing during use, or removed from the hinges and placed on top—or discarded entirely—for high-throughput tip usage.

EASYPACK

EASYPACK contains 5 bags of 200 autoclavable tips each, allowing you to save money by simply reloading them into empty racks. The resealable bags provide easy access and convenient handling.

MEGAPACK

Autoclavable and sterilized, MEGAPACKS use 70% less plastic and offer the flexibility to expose either 96 or 192 tips at a time, making them ideal for high-throughput pipetting.

TOWERPACK

The quick, easy, and affordable rack refill system saves 60% bench space and uses 70% less plastic than standard racks. Its one-hand operation makes refilling simple and efficient.

PIPETMAN EXPERT Tips are available in select countries only.

STERILE FILTERED PIPETTE TIPS FOR USE IN BIOLOGICAL APPLICATIONS

AmpliPur® Expert Tips, sterile version (SAL 10⁻⁶), are certified free from DNA/RNA and DNase/RNase, ensuring reliable results with every use. Compatible with most pipettes on the market and compliant with ISO 8655 standards, they are also made from recyclable materials. AmpliPur Expert Tips offer both durability and performance, making them an excellent value for money.

Sterility and Cleanliness for Reliable Results

Ensure the integrity of your experiments and the reliability of your data. The AmpliPur® Expert Tips, sterile version are certified with a Sterility Assurance Level (SAL) of 10⁻⁶ and are free from Human DNA/RNA and DNase/RNase. Ideal for microbiology, molecular biology, biomedicine, cell culture, and biobanking, they provide the high level of cleanliness and sterility required for your most critical applications.

Sustainable Design for a Greener Future

AmpliPur Expert Tips and their packaging are made from 94% recyclable materials, supporting your commitment to sustainability while reducing environmental impact. This eco-friendly design ensures that your work not only meets the highest scientific standards but also contributes to a more sustainable future.

Excellent Fit With Added Convenience

AmpliPur Expert Tips, sterile version are designed to fit most common pipettes* found in the laboratory (ISO 8655 compliant). We are now elevating the Quality Standard, as well as extending the convenience and usability of the AmpliPur Expert Tips to address the needs of advanced biological workflows.

ERGONOMIC PIPETTING FOR NON-AQUEOUS LIQUIDS

MICROMAN[®] E positive-displacement pipettes, along with capillary pistons, offer the highest precision when ergonomically pipetting non-aqueous samples, such as viscous or volatile liquids. Capillary pistons eliminate the air cushion between the sample and disposable piston, ensuring the accuracy of the pipette is not affected by the physical properties of the sample.

Contamination-Free Pipetting

Minimize the potential for pipette, sample, and human contamination with MICROMAN E. Dispose of the capillary piston (CP) tip safely and without hand contact by simply pushing the push button until the last stop.

Reliable Results Even with Non-Aqueous Liquids

Whether a viscous, volatile, hot, or cold sample, MICROMAN E can handle the job with accuracy and precision. Have complete confidence in your results with the volume-control switch that reduces the risk of accidental volume change.

Triple Protection

Positive-displacement technology is the ideal solution to prevent from aerosols contamination or sample carry-over, protecting the pipette, the user, and the sample.

Capillary Pistons

100% Protection Against Contamination

The disposable piston is located inside the capillary tip so users can be assured that no harmful samples will contaminate the pipette.

- No risk of chemical contamination
- Slender profile—fits most tubes

FASTER MULTIPLE DISPENSING

DISTRIMAN® is a positive-displacement, continuously adjustable, repetitive pipette with a direct readout designed to simplify multiple dispensing when used with DISTRITIPS syringes. With DISTRIMAN, you can dispense the exact volume required for any protocol, even fractional volumes. It is ideal for repetitive dispensing in clinical, hospital, biological, chemical, food and beverage, pharmaceutical, cosmetics, and forensics labs.

Simplifies Multiple Dispensing

Dispense exact volumes without tedious calculations and ensure optimal pipetting results even with volatile or viscous liquids.

An Economical Solution

DISTRIMAN covers a large volume range with only three DISTRITIPS syringes, making it very economical. DISTRITIPS are available in standard or pre-sterilized form (boxes of 50).

DISTRIMAN is the only continuously adjustable mechanical repetitive pipette with direct volume readout available on the market.

DISTRIMAN®	
Description	Part Number
DISTRIMAN (1 µL to 1.25 mL)	F164001

DISTRITIPS®

platemaster®

FAST MICROPLATE PIPETTING

PLATEMASTER® is an easy-to-use solution for high throughput pipetting of 96- and 384-well microplates.

Save Time and Increase Your Productivity

PLATEMASTER's 96-channel design greatly reduces the number of pipetting steps necessary to fill a microplate when compared to using regular manual multichannel pipettes. With PLATEMASTER, the time taken to fill 96-well microplates is significantly reduced to approximately 10-20 seconds or less, and 384-well microplates can typically be filled in less than a minute in only four pipetting steps.

Simplifies Sample Prep

Using PLATEMASTER for higher throughput applications reduces the risk of human error. In a single motion, accuracy and precision levels can equal that of an 8- or 12-channel pipette, while avoiding the risk of skipping or repeating wells. Additionally, all enzymatic reactions and cell-based applications across all wells can be started and stopped at the same time. From 0.5 µL to 220 µL pipetting volumes, expect improved well-to-well and plate-to-plate reproducibility.

Convenient for any Microplate Application

PLATEMASTER is as simple as a PIPETMAN® and does not require programming, long training, or power for use. Through a variety of accessories, such as adapters for loading 384-well microplates, reagent reservoirs, or sample heater blocks, PLATEMASTER can be fully adapted to a variety of application needs. Its compact and portable design easily integrates into the lab, allowing it to fit on most benchtops, under hoods, or in cold rooms.

verity®

DILUTER DISPENSER

The VERITY® Diluter Dispenser is a semi-automatic system for the continuous dispensing of liquids. The VERITY Diluter Dispenser allows you to create and manage pipetting protocols to accurately dispense bulk reagents, perform serial dilutions and titrations, create standards, and much more. When you need more throughput, the VERITY Diluter Dispenser delivers faster, more automated repetitive dispensing than repeaters and electronic pipettes in an easy-to-use, ergonomic design.

Accommodate Your Needs From Lab to Scale-Up

With an available range of syringes from 100 µL to 25 mL, as well as two valve configurations, the VERITY Diluter Dispenser covers a large volume range that will handle all your needs from research to scale-up.

A Simpler Step to Automation

With a VERITY® Syringe Pump, an integral part of your VERITY Diluter Dispenser system, you can upgrade to a fully automated Gilson liquid handling solution when the need for increased throughput arises, making it the first step to automating liquid handling in your laboratory.

VERITY Diluter Dispenser App

The VERITY DD app allows you to create and execute methods and assists applications like titration and continuous dispensing. Comprehensive and intuitive screens guide you through the process.

LIQUID TRANSFERS

Liquid transfers are a routine yet critical part of laboratory workflows. Whether you’re removing culture media, handling sensitive biological samples, or dispensing reagents, efficiency and safety are essential. Gilson provides a complete solution to make liquid handling safer, faster, and more intuitive.

Safe Aspiration Station and Safe Aspiration kit

Quick and Easy Aspiration of Liquid Waste

The Safe Aspiration Station is a stand-alone motorized vacuum unit, ideal for cell culture, ELISA tests, and liquid waste disposal. The closed unit is designed to prevent contamination hazards, and all parts in contact with liquids are fully autoclavable. Associated with the Safe Aspiration Kit, which includes a set of different adapters, the Safe Aspiration Station is easy to use on a bench or in laminar flow cabinets.

MACROMAN®

The Efficient Solution For Pipetting Up To 100 Milliliters At Once

MACROMAN is a reliable pipette controller which can be used with glass and plastic serological pipettes from 1 to 100 mL, with a total volume range from 0.1 to 100 mL.

CytoPur™ Serological Pipettes

Optimized Pipetting Control

Ideal for scientists who need to easily and quickly transfer liquid aliquots from one container to another with precision, the Gilson disposable plastic serological pipettes are perfect for use with MACROMAN® to help you in your daily cell-culture, molecular biology, and microbiology applications.

INCUBATORS AND DRY BATH

Temperature-controlled devices are essential for ensuring the accuracy, consistency, and reproducibility of many laboratory workflows. Gilson’s Incubators and Dry Baths provide reliable, uniform heating performance in compact, user-friendly formats—ideal for molecular biology, sample preparation, enzymatic reactions, and routine lab procedures.

Digital Mini Incubator

Self-Contained Temperature Controls Improve Incubation Accuracy

Using digital temperature controls, the Digital Mini Incubator allows you to set the internal temperature without an external thermometer. The compact incubator accommodates 2 L flasks and has a built-in internal universal outlet for other electrical connections. Models for heating only or heating and cooling are available.

* Minimum temperature is approx. 7°C in 22°C room temp.

MIXERS

Mixers play a vital role in laboratory workflows by ensuring homogeneous sample mixing, re-suspension, or gentle agitation. Whether you’re working with microtubes, conical tubes, or multiple samples simultaneously, Gilson provides reliable and efficient mixing solutions, combining performance, stability, and flexibility.

Mini Vortex Mixer

Small Size, Powerful Mixing

With touch-activated operation, the Mini Vortex Mixer delivers a fixed speed of 2,800 rpm for mixing tubes up to 50 mL. The entire operation is quiet, smooth, and contained in a small footprint.

Roto-Mini Plus

Flexible Variable Speed Rotator For A Range Of Applications

With speeds from 5–70 rpm, the Roto-Mini Plus variable speed rotator offers four operational mixing modes (Standard Rotating, Mix, Pause, and Rock) and accommodates standard tube sizes from 0.5–50 mL, making it a flexible addition to any lab.

Vortex Mixer

Maximize Mixing, Minimize Noise, And Vibration

With a unique counter-balance system, the powerful Vortex Mixer offers instant vortex mixing without noise and vibration. The mixer features both touch and continuous operation with speeds from 200–3,200 rpm and can be used in a range of temperature environments (+4–65°C). Several optional mixing heads are available.

MICROCENTRIFUGES

Designed for quick, efficient spins in everyday workflows, our microcentrifuges provide fast separation in a compact, user-friendly format. Perfect for routine tasks such as microtubes, PCR strips or microplates centrifugation, they offer reliable performance without taking up valuable bench space.

CENTRY™ 101 Plate Centrifuge

No More Spills With Special Rotor Design

With its patented swing-out rotor design, the CENTRY™ 101 Plate Centrifuge prevents microplate contents from spilling, increasing the reliability of your reactions. The two-plate capacity centrifuge accepts most popular PCR plates and microplates and easily fits into hoods and on crowded benchtops.

CENTRY™ 117 Microcentrifuge

Improved Temperature Stability Keeps Samples Safe

Reaching speeds of up to 13,500 rpm, the CENTRY™ 117 Microcentrifuge has an easy-to-use touchscreen and built-in timer and offers one-button recall of up to nine stored custom run programs. Its proprietary air-flow system ensures temperature stability, preserving sample integrity on extended runs. The rotor design accommodates 1.5-2.0 mL tubes as well as PCR strips simultaneously.

CENTRY™ 103 Minicentrifuge

Quick And Safe Sample Centrifugation

The CENTRY™ 103 Minicentrifuge is an easy-to-use and portable benchtop device ideal for the quick separation of particles from a supernatant. It also enables a quick spin down of a drop of liquid from the walls of microtubes.

FRACTION COLLECTORS

IDEAL SOLUTIONS FOR SMALL TO LARGE CAPACITY COLLECTION

Gilson offers advanced solutions for fraction collection from small-footprint to large capacity models. The collectors accommodate a wide variety of collection vessels, including microplates, vials, and tubes. The built-in, easy-to-use keypad makes setup and operation simple. The fraction collectors can be used standalone or controlled by TRILUTION® LC Software. The compact size fits most fume hoods to protect you from hazardous materials.

Powerful Fraction Collection Capabilities

Collection Mode	Without Diverter Valve	With Diverter Valve
Time	X	X
Drop	X	X
Peak		X
Time Windows		X

Multiple Fraction Collection possibilities:
The 3-way diverter valve allows for diverting column void volumes, peaks of no interest, and equilibration volumes to a waste vessel.
Easy integration into any system due to multiple input/output contacts connection, making them the preferred choice for a range of separation applications such as FPLC, flash chromatography, or HPLC.
Optional multicolumn adapters are available for parallel collection from multiple channels.

FC 203B Fraction Collector

The FC 203B Fraction Collector is commonly configured with a MINIPULS® 3 Peristaltic Pump for low pressure chromatography or any fractionation system.

- Holds one rack to perform:
 - Up to 128 fractions (12x75 mm tubes)
 - Up to 105 fractions (13x100 mm tubes)
 - One shallow- or deep-well microplate
- Available with and without diverter valve
- Optional multicolumn adapter to collect from up to 8 separate channels in parallel

FC 203B Fraction Collector	
Description	Part Number
FC 203B, 110/220 V	171011

LEARN MORE

FC 204 Fraction Collector

The FC 204 Fraction Collector is ideal for collecting fractions from a liquid chromatography system from analytical to preparative flow rates. Associated with a peristaltic pump, it can offer a quick installed and low-cost tubing filling system with a small footprint for use in biosafety cabinets with an easy-to-sterilize flow path for minimized contamination.

- Holds four racks to collect:
 - Up to 240 fractions (13x100 mm tubes)
 - Up to 176 fractions (18x180 mm tubes)
 - Up to eight shallow or deep-well microplates
- Available with a 3-way diverter valve for flow up to 20 mL/min or for flow up to 200 mL/min

YOUR PARTNER FOR AUTOMATION SUPPORT & INSTRUMENT SERVICE

AUTOMATE WITH CONFIDENCE: WE'RE WITH YOU AT EVERY STEP

Whether you're just starting to automate or scaling an existing setup, Gilson's team of scientific, application, and automation experts are here to guide you every step of the way. From selecting the right solution to hands-on implementation and long-term service, we help you automate at your pace and with confidence. Our certified engineers and specialists provide personalized installation, protocol guidance, and ongoing support to ensure your system performs reliably and evolves with your lab's needs.

AUTOMATION SUPPORT

Automation Experts to Help You Choose the Right Solution

You know it's time to automate certain workflows—but where do you start? Our team of scientific and automation experts are here to help. We'll work with you to understand your needs, comfort level, and budget, and recommend solutions that align with your goals. You stay in control, entering the automation journey at a pace that works for you.

From initial design to hands-on implementation, our experts will be by your side the entire time, ensuring your system is configured for success and delivering the time and cost savings your lab needs.

LET'S TALK ABOUT AUTOMATION

INSTRUMENT SERVICE

Expert Instrument Service, Backed by Decades of Precision

From installation to long-term support, our instrument service offerings are designed to meet your needs today while preparing you for tomorrow. With a team of scientific, application, and automation specialists, Gilson gives you:

- Certified, factory-trained service engineers
- Application-specific guidance and troubleshooting
- Flexible coverage plans to support your evolving lab
- A partner committed to your success

PIPETTE SERVICE & CALIBRATION YOU CAN RELY ON

REGULAR PIPETTE SERVICE MATTERS

Your pipettes need annual service and calibration by an authorized provider to maintain their accuracy and reliability. Inconsistent results can cost time, money, and confidence in your data. That's why reproducibility and traceable accuracy are at the heart of everything we do. At Gilson, we go beyond the point of purchase:

- Our certified technicians support all major pipette brands and models
- We operate under ISO 8655 guidelines and are ISO 17025 accredited
- We offer both mail-in and on-site service—fast, efficient, and compliant

Whether you're managing a single pipette or an entire lab, we're here to make sure your tools deliver dependable results, every time.

On-Site Pipette Service

If you manage a large number of pipettes, downtime can be costly. With Gilson's On-Site Service, you can keep your operations running smoothly — receiving the same top-quality care as our Mail-In service, but without the wait. Our team comes to you, providing fast and efficient service tailored to your lab's needs.

- Comprehensive Service for All Brands & Models (minimum order applies).
- Fast, Reliable, On-Site Calibration & Maintenance for minimal disruption.
- Expert Technicians ensuring high-performance results. Get Started Today!
- Contact us for more details on clinic requirements, technician availability, and pricing.

Our Service Packages

Our service plans are flexible based on your specific needs: according to the number of measurements you'll request for your service, the price may vary, for more details, visit Gilson.com.

Mail in Service

Need to send your pipettes in for servicing? With Gilson's efficient Mail-In Service, you can quickly get your pipettes serviced and calibrated without any hassle. Here's how it works:

1. **Download and Complete Forms:** Download the service order and decontamination form, then fill them out with the necessary details.
2. **Check Pricing or Request a Quote:** View our pricing or contact us for a quotation.
3. **Prepare Your Pipettes:** Decontaminate and securely pack your pipettes to ensure safe transit.
4. **Ship Them to Us:** Send your pipettes along with the completed forms to the address provided.
