

Technotrate – compatibilità chimica
Technotrate – Chemical compatibility list

Reagent	Technotrate	Reagent	Technotrate	Reagent	Technotrate
Acetaldehyde	*	1-Decanol	*	Oleic acid	*
Acetic acid 100 %	*	Dibromomethane	*	Oxalic acid	*
Acetic acid 50 %	*	Dichlorobenzene	*	n-Pentane	*
Acetone	*	Dichloromethane	*	Perchloric acid	*
Acetonitrile	*	Dichloroacetic acid	*	Perchloroethylene	*
Acetophenone	*	Dichloroethane	*	Petroleum	*
Acetylacetone	*	Dichloroethylene	*	Petroleum ether	*
Acetonitrile	*	Diesel oil	*	Phenol	*
Acetophenone	*	Diethanolamine	*	Phenylethanol	*
Acetylacetone	*	Diethyl ether	*	Phenylhydrazine	*
Acetylchloride	*	Diethylamine	*	Phosphoric acid 85 %	*
Acylic acid	*	1-2-Diethylbenzene	*	Phosphoric acid 85 %	*
Acrylonitrile	*	Diethylene glycol	*	+Sulfuric acid 98 % 1:1	*
Adipic acid	*	Dimethyl sulfoxide (DMSO)	*	Piperidine	*
Allyl alcohol	*	Dimethylaniline	*	Potassium chloride	*
Aluminium chloride	*	Dimethylformamide (DMF)	*	Potassium dichromate solution	*
Amino acids	*	1,4 Dioxane	*	Potassium hydroxide	*
Ammonium chloride	*	Diphenyl ether	*	Potassium permanganate	*
Ammonium fluoride	*	Ethanolamine	*	Propionic acid	*
Ammonium hydroxide, 30%	*	Ethyl acetate (=Acetic acid	*	Propylene glycol	*
Ammonium sulfate	*	Ethyl alcohol	*	Pyridine	*
n-Amyl acetate	*	Ethyl methyl ketone	*	Pyruvic acid	*
Amyl alcohol	*	Ethylbenzene	*	Salicylaldehyde	*
Amyl chloride	*	Ethylene chloride	*	Silver acetate	*
Aniline	*	Ethylene glycol	*	Silver nitrate	*
Aqua regia	*	Fluoroacetic acid	*	Sodium acetate	*
Barium chloride	*	Formaldehyde 40 %	*	Sodium chloride	*
Benzaldehyde	*	Formaldehyde	*	Sodium dichromate	*
Benzene (Benzol)	*	Formic acid, 98-100 %	*	Sodium fluoride	*
Benzene, gasoline	*	Glycerol	*	Sodium hydroxide, 30 %	*
Benzoyl chloride	*	Glycolic acid 50 %	*	Sulfuric acid, 98 %	*
Benzyl alcohol	*	Heating oil (Diesel oil)	*	Tartaric acid	*
Benzyl chloride	*	Hexane	*	Tetrachloroethylene	*
Benzylamine	*	Hexanoic acid	*	Tetrahydrofuran (THF)	*
Boric acid 10 %	*	Hexanol	*	Tetramethylammonium hydroxide	*
Bromobenzene	*	Hydronic acid	*	Toluene	*
Bromonaphthalene	*	Hydromromic acid	*	Trichloroacetic acid	*
Butanediol	*	Hydrochloric acid, 10 %	*	Trichlorobenzene	*
1-Butanol (Butyl alcohol)	*	Hydrochloric acid, 20 %	*	Trichloroethane	*
n-Butyl acetate	*	Hydrochloric acid, 25-37 %	*	Trichloroethylene	*
Butyl methyl ether	*	Hydrogene peroxide, 35%	*	Trichlorotrifluoroethane	*
Butylamine	*	Iodine/potassium	*	Triethanolamine	*
Butyric acid	*	Iodine solution	*	Triethylene glycol	*
Calcium carbonate	*	Iso Octane	*	Trifluoro ethane	*
Calcium chloride	*	Isoamyl alcohol	*	Trifluoroacetic acid (TFA)	*
Calcium hydroxid, conc.	*	Isobutyl alcohol	*	Tripropylene glycol	*
Calcium hypochloride	*	Isopropyl alcohol	*	Turpentine	*
Carbon disulfide	*	Isopropyl benzene	*	Urea	*
Carbon tetrachloride	*	(Cumene)	*	Xylene	*
Chloro naphalene	*	Isopropyl ether	*	Zinc chloride, 10 %	*
Chlorobenzene	*	Lactic acid	*	Zinc sulphate, 10 %	*
Chloroacetaldehyde, 45 %	*	Methoxybenzene	*		
Chloroacetic acid	*	Methyl alcohol	*		
Chloroacetone	*	Methyl butyl ether	*		
Chlorobutane	*	Methyl formate	*		
Chloroform	*	Methyl propyl ketone	*		
Chlorosulfonic acid	*	Methylene chlorid	*		
Chromic acid 10 %	*	(Dichloro methane)	*		
Chromic acid 50 %	*	Mineral oil (Engine oil)	*		
Chromosulfuric acid, conc.	*	Monochloroacetic acid	*		
Copper sulfate	*	Nitric acid, 30 %	*		
Cresol	*	Nitric acid, 50-70 %	*		
Cyclohexane	*	Nitrobenzene	*		
Cyclohexanone	*				
Debenzyl ether	*				
Decane	*				

The above recommendations reflect testing completed prior to publication of this brochure. In addition to these chemicals, a variety of organic and inorganic saline solutions (e.g., biological buffers), biological detergents and media for cell culture can be dispensed. Should you require information on chemicals not listed, please feel free to contact us.
